

## **Recommended maintenance of competence**

All competence that is required in the training plans published by the Petroleum Safety Authority Norway must be maintained.

Reference - Activity regulations § 21 and technical and operational regulations § 50.

There is a requirement for documentation of necessary competence, that the competence has been verified, through exercises and training. The following areas should be emphasized in particular during repetition training:

- applicable regulations and standards;
- Internal company procedures
- emergency procedures;
- correction of unwanted behaviour.

Recommended maintenance of competence can be done internally in the company with a mentor or externally course activities.

Maintenance of competence must be documented.

Recommended intervals:

- Maintenance of Certified Competence - Minimum 4 annual intervals.
- Maintenance of Documented Competence - Minimum 5 annual interval.
